

eXist

Clifford B. Anderson
Associate University Librarian for Research and Learning

eXist is a “a NoSQL Document Database and Application Platform,” or, in plainer terms, a digital platform for XML documents.

TEI-based projects using eXist include the Office of Historian at the State Department, Buddhist Digital Resource Center, Syriaca.org, ArchitecturaSinica.org, and LOGARAndes.org, among many others

Installing eXist

eXist Dashboard

Connecting eXist to oXygen

- Data Source Explorer View
- XQuery Execution Support
- XQuery Validation Support
- WebDAV
 - <http://localhost:8080/exist/webdav/db/>

See https://www.oxygenxml.com/xml_editor/eXist_support.html
